NEWS ABOUT MEMBERS

Jay V. HUNER of Southern University in Baton Rouge, Louisiana has accepted a position of Visiting Scientist at the University of Kuopio, Kuopio, Finland for the 1982-83 Academic year.

Charles GOLDMAN is coauthoring a textbook on limnology for McGraw Hill Publishing Company; the text will be available August, 1982.

NECROLOGY

We are deeply saddened by the untimely passing of James NOLFI in February of 1981. Jim was a regular contributor to the IAA symposia and presented a paper at the Davis meeting in August. Jim had a quick wit, a pleasant smile, and a genuine concern for his fellow man. He significantly touched the lives of many through his teaching and research. We shall miss him.

SYMPOSIUM VI: IAA

Stellan KARLSSON reports that the local organizing committee in Lund has selected August 13-15, 1984 (Monday thru Wednesday) as meeting dates for IAA Symposium VI. The meeting will occur at the University of Lund, Sweden and post-congress tours are planned for the remainder of the week. A provisional program will be published later this year.
COMMUNICATIONS FROM MEMBERS

Charles Goldman reports that publication of the Proceedings (Volume V) from the California Davis meeting (Summer, 1981) is coming along well. Currently the editing phase is near completion, and edited versions will soon be mailed to the authors. Dr. Goldman notes that two extra papers will appear in this volume. The first, by N.M. Morrissey who studies marron culture; Noel was unable to attend the meetings. The second is an older paper submitted to Ecology by Sture Abrahamson and was in the hand of the editor at the time of Sture's death.

Robert France is currently involved in assembling information regarding the status of toxicological studies of anthropogenic pollution on crayfish. If members know of working drafts of manuscripts or relatively obscure references on this subject, he would appreciate learning about them. Bob is preparing a review article along with recommendations and indicates that the publication will be in the form and style of Sprague, 1976 in Volume 33 of the Journal of the Fisheries Research Board of Canada. Bob's address is given on the list of members with this issue.

Stellan Karlsson reports two projects on crayfish production in Sweden. These projects are in the planning stages. In one Pacifastacus leniusculus will be raised in outdoor ponds using water from a river. A second project will produce a combination of salmonid fishes, turbot, freshwater prawns (Macrobrachium rosenbergii), and P. leniusculus using heated waste water from a nuclear power plant.

ORGANIZATION NEWSLETTERS

In March the Louisiana Crawfish Farmers' Association issued the first number of its newsletter entitled "Crawfish Tales." The publication, an interesting collection of articles, advertising, and recipes, is available for an annual subscription of $5.00. Payment should be made to the Louisiana Crawfish Farmers' Association, P.O. Box 91544, Lafayette, La. 70504. Some examples of titles in volume one are: "Research Methodology at the University of Southwestern Louisiana Crawfish Research Center," "Current Crawfish Research," "The Signal Crawfish from California," and "The National Species Plan."

In March the Crustacean Society issued the first edition of its newsletter entitled "The Ecdysiast." The newsletter is available to all members of the Society, and information on joining appears in previous issues.
LITERATURE: AUSTRALIAN CRAYFISHES

Peter GREENAWAY sent the following list of recent papers published on Australian crayfishes. They are given in the computer literature search style as received:

Recent Literature on Australasian Crayfish

CURRENT MEMBERSHIP LIST

The following is a list of the current membership of the International Association of Astacologists. Names of new members will be included with future newsletters.
